Introducing Zedwax

Premium ribbons for Zebra™ printers

To help TTS grow our business across Europe we have introduced 2 new wax formulations that we have developed over the last few years. We are having these formulations contract coated for us by a major thermal transfer ribbon producer. Our contract coating partner uses the latest high quality Japanese coating machines, ink mixing stations and environmental solvent recovery and is also the only TTR Company in the world to produce their own 4.6 micron PET film. With over 1 billion square metres of coating capacity and PET film production this gives us extremely competitive pricing and stability of supply for the future.

The 2 new premium grades of wax thermal transfer ribbons have been developed for maximum performance when used on the Zebra™ range of thermal transfer printers. They are available with high profile Zedwax branding including printed leaders and printed cores.

The new Zedwax and Zedwax Plus grades will be sold exclusively to a selective network of partners and will be supported with very competitive pricing.

In addition to the extremely competitive pricing offered for the Zedwax grades, TTS can also ensure that our Zedwax partners get the best possible pricing for the rest of the TTS product range along with discounted prices on Zebra™ printer Service contracts, Ad Hoc repair and the ZEDHEAD range of Zebra™ compatible printheads.

If you are interested in the new Zedwax grades, please contact your Business Development Manager today for more information.

All trademarks are recognised and used for comparative purposes only. The Zedwax brand or range of products is not endorsed by any of these manufacturers.
